STEEL TO COMPOSITE
MAKE IT WITH SAERTEX®
FROM STEEL TO COMPOSITE WITH SAERTEX®

Achieve LIGHTWEIGHT, DESIGNABILITY and CORROSION RESISTANCE with SAERTEX materials and services. From the initial idea to serial production, SAERTEX supports you to switch from steel to composite. Push your project forward with SAERTEX.
SAERTEX® MATERIALS
"TAILOR-MADE"
Composite reinforcement materials in glass, carbon and aramid

SAERTEX® SERVICES
"ON DEMAND"
Freely defined according to your needs
Optimised for your process
Geared towards your objectives

OUR CONTRIBUTION TO YOUR PROCESS

- Support for
  - Design
  - Calculation
- Choice of material
- Advisory service
- Individual cutting
- Material development
- Logistics concepts
- Component production service
- Draping experiments
- Preforming
- Training
- On-site support
- Prototyping
- Laboratory testing

YOUR VALUE-ADDED PROCESS

- Your idea
- Engineering
- Material specification
- Process development
- Preliminary series
- Serial production
- Your component

PROFIT FROM OUR COMPETENCE

SAERTEX is the partner to switch your processes from steel to composite: with services from design, calculation and prototyping up to part production. Take advantage of our unique expertise in the development and production of composite materials out of glass, carbon or aramid fibers.

We will support you in this change process with our project management experience proven in highly demanding industries such as aerospace or wind energy. Get a head start in composite solutions. It will be easier and more successful than you think. Free your mind to the composite possibilities.

Example:

See what we have done with our partner Rolls-Royce in the carbon Azipull 65c project on:

With approximately EUR 320 million of annual revenue and some 1,200 employees, the family-owned company SAERTEX is the global market leader in the manufacture of multiaxial fabrics (non-crimp fabrics) and core materials for the production of fiber-reinforced composites. We believe proximity to our customers is important. We want to be there for our partners, ready to help them when they need us. This is why we are represented with engineering and production facilities in 8 countries on 5 continents, and offer a service network in over 50 countries worldwide.
